in industry. Having the subject information easily availar achieved by developing this product. Not protecting the Permanent Confidentiality: The applicant requests the exhibits listed above as perm	in developing this product and it is one of the first of its kind able to "competition" would negate the advantage they have details of the design will result in financial hardship. Inanently confidential be permanently withheld from public proprietary information not customarily released to the public.
period of <u>(specify number of days not to exceed 180</u> Authorization and prior to marketing. This is to avoid p	premature release of sensitive information prior to marketing aware that they are responsible to notify ACB in the event le available to the public. ACB will then release the
NOTE for Industry Canada Applications: The applicant understands that until such time that IC di Confidentiality, either type of marked exhibit above wil Sincerely, By:	
Title: CEO	

Please refer to http://acbcert.com/documents/misc-docs/Memo-Short-Term-Vs-Standard-Confidentiality.pdf for complete details.

¹ - The asterisked items (*) require further justification before permanent confidentiality will be allowed. These also currently require review by the FCC under their Permit-But-Ask policy before the grant is issued and can delay completion of an application. Further justification should be added to the note above. One such example for a potted device would be: "The EUT is FULLY potted using a non-removable epoxy based material. Removal of potting material causes irreparable damage to internal circuitry. See photographs exhibits that outline the device before and after potting."
